1- Your friend wants to know how to keep fit.
2- Your friend asks you to recommend a place to go on Friday.
3- You tell a friend what you did last Saturday at midday.

B. Reading Comprehension (5 marks)

3. Read the following passage, then answer the questions: (5 marks)

In the winter, many animals and birds travel hundreds of kilometres to places with a warmer climate and more food. This journey takes place every year at about the same time. It is common to see birds sitting on walls or telephone wires waiting to travel the long distance between the places where they spend their summers and their winters.

Scientists do not know exactly how they find their way to and from their winter homes. Some people believe that birds depend on their senses, including their sense of smell, to help them find the way. Some animals and birds travel thousands of kilometres. It is surprising that blue whales have been known to travel up to 20.000 kilometres.

A. Answer the following questions:

1- Why do birds spend winters and summers in different places?
2- Where do birds sit waiting to travel the long distance?
3- What is surprising about the blue whales?

B. Choose the correct answer from a, b, c, or d:
